

SoulCapsule — Differentiator Manifesto

SoulCapsule is not a journaling app.

It is a compression engine for the human experience. Not to record the moment—but to preserve the way it felt.

What Makes It Unique:

- Style-Driven Compression: We don't summarize. We distill raw thoughts into expressive capsules that mirror the user's style.
- Emotion-Aware Decompression: Capsules replay in modes that feel like 'you' — tweet, poem, whisper, or self-talk.
- Multimodal Input with Context: Voice, text, eventually image and ambient states.
- The 'I' is Sacred: Each person trains their mirror. No flattening.
- Time-Based Drift Memory: SoulCapsule tracks your emotional and stylistic evolution.
- Legacy Simulation: Simulate your past self through stylistic echo and capsule history.

No one else is doing this.

They summarize. We witness. They store. We compress. They serve productivity. We serve identity.
